SKILLS

Programming Languages:	Java, HTML, CSS, SQL
Frameworks/Tools:	Spring Boot, GitHub, Postman, JIRA, Kibana
Web Technologies:	REST APIs, JSON
Subject Knowledge:	OOPS, DBMS, Computer Network, DSA
Databases and Backend:	SQL, OracleDB, FireBase, Backend API Development

WORK EXPERIENCE

Cognizant Technology Solutions Programmer Analyst

Full-Time | September 2024 – Current

- Developed and maintained RESTful APIs using Spring Boot, handling JSON request/response processing, data mapping, and validations as per business requirements.
- Actively participated in code debugging and issue resolution, using logs and monitoring tools such as Kibana to identify and fix runtime and production issues.
- Supported development of backend service integrations, ensuring smooth data flow between APIs and database systems.
- Worked extensively with Spring Boot, implementing controllers, service layers, and repository layers to ensure scalable backend design.
- Worked on Spring Boot features including request handling, exception management, integration of backend services with databases and making interfaces .
- Efficiently managed Oracle Database operations, including writing optimized SQL queries.
- Performed API testing using Postman, verifying functionality, response accuracy.
- Contributed to quality assurance activities, independently handling bug fixes and production/ Regression issues to maintain high product quality.
- Collaborated with frontend teams and gained basic hands-on exposure to React, supporting minor UI changes and integration with backend APIs.
- Worked closely with senior developers and stakeholders to analyze client requirements, define user stories, and contribute to design and implementation of new features.
- Java, Spring Boot, RESTful Services, MVC Architecture, Oracle DB, SQL, Postman, JIRA, Kibana, React (Basic)

Technophillia Solutions Web Dev. Intern

Remote | July 2023 – August 2023

- Developed a responsive Weather Application that fetches real-time weather data using REST APIs, implemented Java backend services to handle API requests, process JSON responses, and expose data to the frontend, with features including geolocation-based weather detection and city-wise search, and dynamic UI updates using JavaScript.
- Java (Backend API Handling), HTML, CSS, JavaScript, OpenWeatherMap REST API, Geolocation API, Web Storage (SessionStorage)

EDUCATION

C.V. Raman Global University
Computer Science and Engineering BTech
CGPA: 8.48

Bhubaneswar
2020 - 2024
